

Content Object Settings in Blackboard

In the “**Build**” tab, each content object on a page has a small grey button to the right of the object title or icon.

This grey button activates a drop-down menu for the object that contains several options as seen in the illustration below:

Some objects have different options available depending on the nature of the object.

Note: Objects viewed via the “**Teach**” tab contain teaching or grading related options instead of design options. If you cannot find an option that you need, try another tab.
